

SEE PROJECTS

ABOUT ME

New technologies enthusiast, with a strong focus on designing and developing cross-platform web applications and video games.

Recently, I've been working on large-scale projects using the latest versions of Angular, leveraging micro frontends and building dynamic, reusable libraries to improve development efficiency and scalability.

Proactive, creative, self-taught, and solution-oriented.

Adrián Rodríguez

Software Developer & Tech Lead

WORK EXPERIENCE - LAST ROLES / PROJECTS

Senior Full Stack & Architect – Admiral Seguros / Entelgy (Insurance Sector)

- Designed and delivered a security-focused access control application, owning the full lifecycle end-to-end, including image optimization and lazy-loaded screens.
- Led the development of features across microservices, ensuring adherence to hexagonal architecture principles and clean code best practices.
- Implemented dynamic routing and role-based access control, along with secure authentication/authorization using OIDC, tokens, and interceptors.
- Built custom state management (Redux-inspired) using Angular Signals.
- Leveraged Angular lifecycle features (routing, guards, lazy loading, hooks).
- Built UI with Angular, PrimeNG, Tailwind, and designed dynamic theming systems based on Figma, loaded via JSON.
- Created dynamic reactive forms using JSON configurations and Formly, leveraging a zoneless approach for performance.
- Ensured accessibility compliance using automated and manual auditing tools enforcing WCAG 2.1 A/AA standards, semantic HTML, ARIA roles, and keyboard navigation.

Senior Front End & Tech Leader - Iberia / Plexus Tech (Transport Sector)

- Translated business requirements into technical specifications (DRD → DLD).
- Ensured accessibility compliance (WCAG A/AA, a11y, WAI-ARIA).
- Designed Hexagonal Architecture for scalable applications.
- Managed state with NgRx Signals and Entities, leveraging the Observer pattern for enhanced app state security.
- Developed mobile apps with Ionic, integrating native Kotlin/Swift features.
- Built advanced data tables (filtering, sorting, infinite scroll) with PrimeNG.
- Applied reactive programming to optimize performance and change detection.

Senior Front End & Project Manager - Allianz / TSystems (Insurance Sector)

- Analyzed requirements and produced technical documentation for frontend and backend solutions.
- Estimated, modularized, and coordinated task delivery, ensuring clear communication across the team.
- Led frontend architecture using Micro Frontends and Module Federation, including Angular migrations for long-term maintainability.
- Designed database models and ensured data integrity and security across multiple system entry points.
- Built reusable, scalable solutions: multi-dependency forms, services, components, and internal libraries (SCSS, BEM, DRY).
- Optimized large data handling (multi-megabyte payloads) and complex object mapping.
- Enforced clean code practices (SOLID, modularization, secure coding) and mentored the team in Angular best practices.
- Managed Micro Frontend entry points with proper authorization and access control.
- Developed advanced testing strategies (unit tests, mocks) and collaborated closely with QA, occasionally taking ownership of testing processes.

WORK EXPERIENCE - TECHNOLOGIES

Feb 2025 - July 2026 **Senior Full Stack Developer & Software Architect - Entelgy**

- **Front**: Angular (12-20), AngularJS, PrimeNG, Signals, Formly, Tailwind, SCSS, TS, JS, NGRX, RxJs, Hexagonal Architecture, migrations, formly, npm.
- **Back End**: Java, SpringBoot, JUnit, Mockito, PostgreSQL, Kafka, Hex. Architecture.
- **DevOps**: CI/CD, Jenkins, Nexus, Grafana, PostMman, AWS, DBeaver.
- **QA**: Selenium, Storybook, Playwright, integration, unitary & performance tests.
- **Manager/IA**: SCRUM, Safe, JIRA, Notion, Confluence, Github Copilot, Gemini.

Aug - Dec 2024 **Senior Front End Developer & Tech Leader - Plexus Tech**

- **Front**: Angular (16-18), PrimeNG, Signals, AngularMaterial, SCSS, TS, NGRX, RxJs, Hexagonal Architecture, Ionic, NX, yarn, npm, pnpm, Jest, NgMocks.
- **DevOps/QA**: SonarQube, Jenkins, Docker, Nexus, Cypress, Unit & Integration test.
- **Manager**: SCRUM, Confluence, Trello, JIRA.

Sep 2023 - Jul 2024 **Senior Front End Developer & Project Manager - TSystems**

- **Front**: Angular (15-18) Module Federation, AngularMaterial, Ionic, SCSS, TS, Redux, Nebular, RxJs, Micro Front-Ends, npm, InVision, Karma & Jasmine.
- **Back**: SpringBoot(2, 3), Java (8, 11, 17), DDD, PostgreSQL, Postman, Swagger & DB Visualizer, Oauth2.
- **Manager**: SCRUM, Confluence, Trello, JIRA, SonarQube, Jenkins.
- **DevOps**: SCRUM, Azure DevOps, Lighthouse, Checkmarx.

Mar 2022 - Jul 2023 **Senior Front End Developer & Software Analyst - Proeduca**

- **Front**: Angular (9-15) SCSS, TS, RxJS, AngularMaterial, PrimeNG, SCSS, NgBootstrap, Redux, Micro Front-Ends, npm, Figma, Karma & Jasmine.
- **Back**: .NET, C#, SQL Server, Postman, Swagger & SQLDBM.
- **DevOps**: SCRUM, Azure DevOps, Lighthouse, Checkmarx

Sep 2017 - Dec 2021 **Full Stack Developer - iCloud Software Facility Management**

- **Front**: Android, Ionic, Js Vanilla, TS, Angular (8-11), AdobeXD & React.
- **Back**: Java, MySQL, Springboot, NodeJS, Gradle, Maven, PL-SQL, JPA & Hibernate.
- **DevOps**: SCRUM, JIRA, Docker & Jenkins.

WORK EXPERIENCE - INDEPENDENTLY

2024 - Currently **Tech Lead - Code Aw Apps**

- **Front**: Angular (16-22), Signals API, Zoneless, PrimeNG, AngularMaterial, SCSS, TS, NGRX, RxJs, Clean Architecture, Bun, Bit, Biome, Ionic, Mobile first, React, Preact, React Native, Flutter, Kotlin, Astro, Vitest, ThreeJS.
- **Back**: NodeJS, ExpressJS, Fastify, Java, SpringBoot, .NET, PostgreSQL, CORS, Python, .NET, Nglnx, p2m, MongoDB, Oauth, JWT.
- **DevOps/Manag**: CI/CD, SCRUM, Jira, Cloudfare, Docker, Podman, Youtrack.
- **IA:** Opencode, Claude Code, Kimicode, Github Copilot, Ollama & LLMStudio

2017 - 2024 **Software Developer - Freelance**

- Angular, TS, SCSS, NestJS, Java, Kotlin, C#, C/C++, Springboot, API REST, Figma, SQL, Canvas, JIRA, Trello, Jenkins, Bootstrap.

ACADEMIC DATA

Software Engineer
UOC | Currently

FPGS Mult-platform App Development
EDIX

Electronics Communication Engineer
UPM

Front End Dev using HTML, CSS & JS
Miradax & UPM

Wearables & Smart TV Development
Samsung Tech Institute (Certified)

IOT
Samsung Tech Institute (Certified)

SKILLS

- Project Management
- Analysis & Development
- UI/UX, Responsive Design
- Usability, Accesibility & SEO
- QA, Testing
- Software Architecture
- API REST & RESTFull
- Web Security
- Data Structures & Algorithms
- DevOps CI/CD, & Agile
- Design Tools
- Electronics & IOT
- Windows, Max OS & Unix (Linux)
- IA Tools

TECH COURSES

- **Angular de cero a experto** Fernando Herrera
- **Angular Forms in Depth v22** Angular University
- **Angular Signals in Depth v22** Angular University
- **Principios SOLID y Clean Code** Fernando Herrera
- **Advanced CSS and SASS** Jonas Schmedtmann
- **Diseño UX/UI Figma 2024** Javier Cañas
- **RxJs Reactive** Fernando Herrera
- **Redux NgRx** Fernando Herrera
- **Complete Agile Scrum Management** Omni Academy
- **Zero to PMP: Master Project Management for PMP Certification** Sabri C. PMP
- **NgRx with NgRx Data** Angular University
- **Microservicios SpringBoot** Carlos Adrián Soto Botero
- **Microser. SpringBoot Docker** Madan Reddy
- **Event-Driven Microservices** Ali Gelenler
- **Claude Code** Fernando Herrera
