Adrián Rodríguez

Software Developer & Tech Lead

Madrid, Spain · adrianrodriguezmontesinos.github.io/cv/ · github.com/adrianrodriguezmontesinos

PROFESSIONAL SUMMARY

Software Developer and Tech Lead with experience designing web applications, cross-platform mobile solutions, and video games. Recent work includes large-scale Angular projects, micro-frontends, and reusable libraries, with a focus on maintainability, accessibility, and scalable software. Proactive, creative, self-taught, and solution-oriented.

PROFESSIONAL EXPERIENCE

Senior Full Stack & Software Architect

Feb 2025 - Jul 2026

Admiral Seguros / Entelgy · Insurance sector

- Designed and delivered a security-focused access control application end to end, including image optimization and lazy-loaded screens.
- Led the development of features across microservices, ensuring adherence to hexagonal architecture principles and clean code best practices.
- Implemented dynamic routing, role-based access control, and OIDC-based authentication and authorization using tokens and interceptors.
- Built Redux-inspired state management using Angular Signals and applied routing, guards, and lazy loading.
- Developed Angular UIs with PrimeNG and Tailwind CSS, using JSON-driven themes based on Figma designs to reduce styling development time by 40%.
- Created reusable, JSON-configured reactive forms with Formly and a zoneless approach, reducing form-logic development time by 30% and improving scalability.
- Applied manual and automated accessibility checks for WCAG 2.1 A/AA, semantic HTML, ARIA roles, and keyboard navigation.

Tech Lead & Co-Founder

2024 - Present

Code Aw Apps · Independent projects developed in parallel

- Developed web and mobile applications with Angular, Signals, Ionic, React, Preact, React Native, Flutter, Astro, and Kotlin.
- Worked with Node.js, Express, Fastify, Java, Spring Boot, PostgreSQL, and MongoDB; used Docker, Podman, Cloudflare, and CI/CD tooling.
- Used AI development tools including Claude Code, GitHub Copilot, OpenCode, Ollama, and LM Studio.

Senior Front End Developer & Tech Leader

Aug 2024 - Dec 2024

Iberia / Plexus Tech · Transport sector

- Translated business requirements into technical specifications (DRD to DLD).
- Designed scalable web applications following hexagonal architecture principles.
- Managed application state with NgRx Signals and Entities, applying reactive programming to improve change detection.
- Ensured accessibility across web applications in line with WCAG A/AA and WAI-ARIA guidelines.
- Developed Ionic mobile applications integrating Kotlin and Swift native features.
- Built PrimeNG tables with filtering, sorting, and infinite scrolling.

Senior Front End Developer & Project Manager

Sep 2023 - Jul 2024

Allianz / T-Systems · Insurance sector

- Analyzed frontend and backend requirements and produced technical documentation; estimated, organized, and coordinated delivery tasks.
- Led frontend architecture with Micro Frontends and Module Federation, including Angular migrations, reducing frontend development time by 20%.
- Designed database models with attention to data integrity and security across system entry points.
- Built reusable internal libraries, components, services, and multi-dependency forms using SCSS, BEM, and DRY principles, reducing development time for shared frontend features by 50%.
- Handled multi-megabyte data payloads and complex object mapping.
- Applied SOLID, modularization, and secure coding practices; mentored developers in Angular.
- Managed micro-frontend entry points and authorization; developed unit testing and mocking strategies in collaboration with QA.

Senior Front End Developer & Software Analyst

Mar 2022 - Jul 2023

Proeduca

- Worked with Angular, RxJS, Redux, SCSS, Angular Material, and PrimeNG in micro-frontend applications.
- Used .NET, C#, SQL Server, and Swagger on the backend; Azure DevOps, Lighthouse, and Checkmarx for development and quality workflows.

Full Stack Developer

Sep 2017 - Dec 2021

iCloud Software Facility Management

- Developed web and mobile applications using Angular, React, Ionic, Android, and JavaScript.
- Worked on backend services and databases with Java, Spring Boot, Node.js, MySQL, PL/SQL, JPA, and Hibernate; used Docker and Jenkins.

Software Developer

2017 - 2024

Freelance · Independent work

- Developed software projects using Angular, TypeScript, NestJS, Java, Spring Boot, and REST APIs, with UI work in Figma, Bootstrap, and HTML5 Canvas.

TECHNICAL SKILLS

Frontend & Mobile: Angular, TypeScript, JavaScript, RxJS, NgRx, Signals, React, Preact, React Native, Ionic, Flutter, HTML, CSS, SCSS, PrimeNG, Tailwind CSS, Angular Material, Formly, Nx, Module Federation

Backend & Data: Java, Spring Boot, JUnit, Mockito, PostgreSQL, Kafka, Node.js, Express, Fastify, NestJS, .NET, C#, SQL Server, MySQL, PL/SQL, JPA, Hibernate, REST APIs

Architecture & Security: Hexagonal Architecture, Micro-frontends, DDD, SOLID, Clean Code, OIDC, OAuth 2.0, Role-Based Access Control, JWT, Web Security

QA, DevOps & Tools: Selenium, Playwright, Storybook, Jest, NgMocks, Cypress, Jenkins, Docker, Podman, AWS, Azure DevOps, Grafana, SonarQube, Checkmarx, CI/CD, Jira, Confluence, Figma

Collaboration & Practices: Project Management, Scrum, Agile, UI/UX, Responsive Design, Accessibility, WCAG 2.1 A/AA, WAI-ARIA, GitHub Copilot, Claude Code

EDUCATION & CERTIFICATIONS

Software Engineering (in progress) — UOC

Higher Vocational Diploma in Multiplatform Application Development — EDIX

Electronics & Communications Engineering — UPM

IoT and Wearables & Smart TV Development (certificates) — Samsung Tech Institute

Frontend Development with HTML, CSS & JavaScript — Miríadax / UPM

LANGUAGES

Spanish: Native · English: C1

PROFESSIONAL DEVELOPMENT COURSES

Angular & Frontend: Angular, Angular Forms, Angular Signals, RxJS, NgRx, CSS/SASS, Figma UX/UI

Architecture & Backend: SOLID, Clean Code, Spring Boot Microservices, Docker, Event-Driven Microservices

Project Management & AI: Agile Scrum, Scrum Master training, PMP preparation, Claude Code
